

## TOGO: WELL LOG DATA

### Formats Available

Well data from TGS is available in a number of industry standard formats, including digital LAS curves. Only TGS offers Workstation Ready processing, which corrects errors originating from the logging contractor, merges multiple and overlapping runs, performs depth-shifting and standardizes curve mnemonics.

### Online Access

Togo well log data is available via LOG-LINE Plus!®, an online gateway to TGS' collection of well log and other borehole-related data. With time-saving search and data browsing options, it enables users to find precisely the data they need quickly, and download it immediately. LOG-LINE Plus! draws from TGS' quality controlled collection of more than six million instances of well data from key exploration plays worldwide.

TGS is authorized to license well data via an agreement with the government of Togo.
